

# Star Rods

The Rods That Break The Records.

## 2009

## *Since the company's beginning in 1958...*

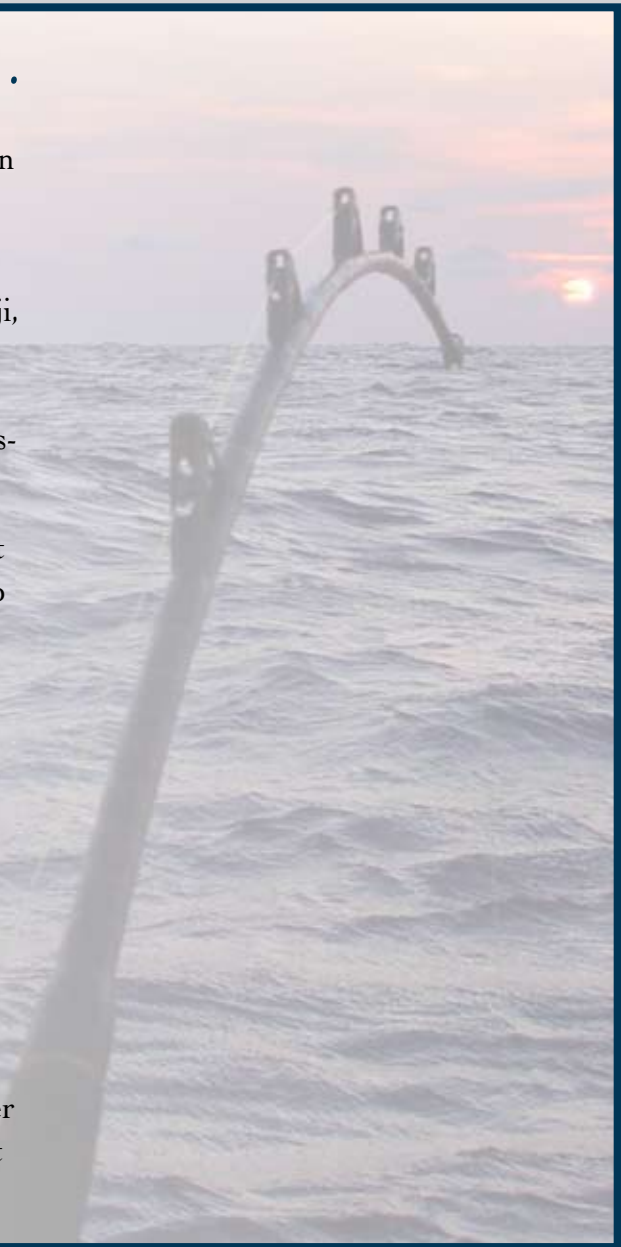

Star Rods has given fishermen a high quality, hand-crafted rod at an affordable price. Manufactured in small production runs one at a time, Star Rods builds custom-style rods with maximum value.

Star Rods chooses the highest quality components – from Fuji, AFTCO and Stuart. Blanks are made to Star Rods' unique and demanding specifications, gained from a lifetime of rod building and fishing experience, using the company's own custom mandrels.

Whatever the manufacturing need, Star Rods uses the best parts available, or helps component manufacturers develop custom parts particularly for Star Rods. Star Rods uses the highest quality materials: Grade A cork grips, Fuji and Stuart reel seats, Fuji, AFTCO and Stuart guides, EVA grips, high-quality epoxy and thread.

While similarities exist in the design of each rod series, each is engineered with a construction all its own to meet a particular fisherman's needs for strength, action and durability.

Today, Star Rods are known as the rods that break the IGFA World Records – tough, high quality, durable rods designed for the discriminating fisherman. They're sold through knowledgeable, experienced dealers who can offer expert advice on local fishing conditions to help you select the perfect rod for your needs.

*Don't get the idea that Star Rods doesn't know its way around freshwater fish, either. With dozens of styles in every line class and action, Star Rods has a rod for your favorite fish - whether it's bass or snook, redfish or catfish, sailfish or muskie.*

*From making the blanks to fastening a tip top, from setting the reel seat to adding a stylish diamond wrap, Star Rods are still painstakingly built by hand, one at a time, to keep the records coming. For more than 40 years, Star Rods have been proudly handmade, blending high-tech construction and American craftsmanship.*

## Quality Components

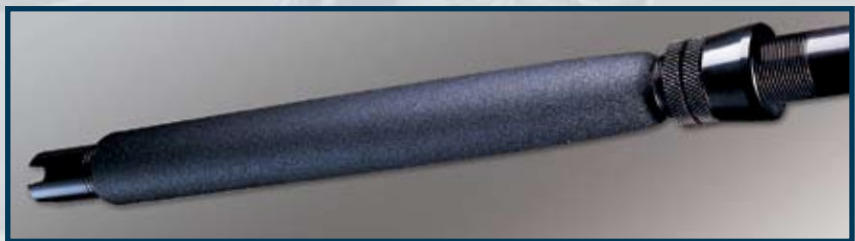

One of the most important components of a world class rod is its reel seat, because even the smallest rattle or slip can rob you of your fish fighting power. With Star Rods that won't happen. Our rods are fitted with Fuji or Stuart reel seats for a snug, wobble-free fit that's durable, reliable and trouble-free.

A rod is only as good as its guides. That's why Star Rods selects, Fuji, AFTCO, and Stuart guides for its rods. Nobody makes, harder, smoother guides than Fuji - guides that reduce friction and abrasion on fishing lines during long, tough battles with trophy fish. For roller guides, AFTCO and Stuart are known to be the world's best.

## Meticulous Construction

From the tip-top to rod butt, Star Rods are designed for serious fishing. The patented Power•Butt is an exclusive Star Rods innovation. The Power•Butt is made from durable composite material that is kind to anglers and mean to fish. Many times tougher than EVA foam, the comfortable Power•Butt is abrasion resistant, lightweight and draws from a rod holder more easily than EVA foam.

## Outstanding Innovations

Only the finest graphite materials and durable E-Glass fibers are used to make Star Rods blanks. Innovations like the exclusive Duratech Technology adds to sensitivity, strength and durability. Our Plasma series takes this technology to a new level.

*If you want the absolute best, look no further...*

# Plasma<sup>®</sup>

Combine extra-high modulus graphite with Duratech multi-directional epoxy technology. Roll this together under extreme pressure, add Duratech butt weave for additional lifting power, and you have our Plasma series. Possibly the finest quality fishing rod in the world.

Naturally, the best should be built with the finest components. All Plasma rods feature Fuji SIC (silicon carbide) concept guide system. SIC is one of the hardest ring guides available and Fuji makes the best. Graphite reel seats and gimbals are also manufactured by Fuji. Aluminum butts, reel seats and gimbals are custom made by Stuart. Black AFTCO roller guides are available on 3080 and 40100 lb rods. Only high quality cork is used where applicable.

These rods are a natural for any premium reel. You can fish comfortably using the lightest mono, the heaviest braid or wire line. Whether you fish for bonefish on the flats, stripers in the rips, or marlin in the canyons, there is a Plasma rod for you. The content of graphite and Duratech varies in each rod, thus producing an ideal combination of weight, sensitivity and power. Pick one up and feel the Plasma.

# Nickelite®

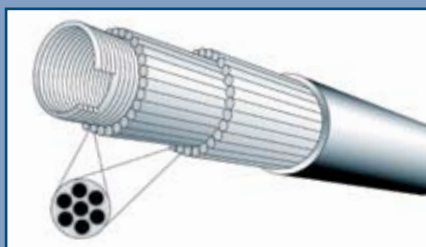

One of the greatest innovations to fishing rods in this century has been the introduction of graphite rod material. Light, strong, powerful and responsive, graphite rods have changed the rod industry for many fishing applications.

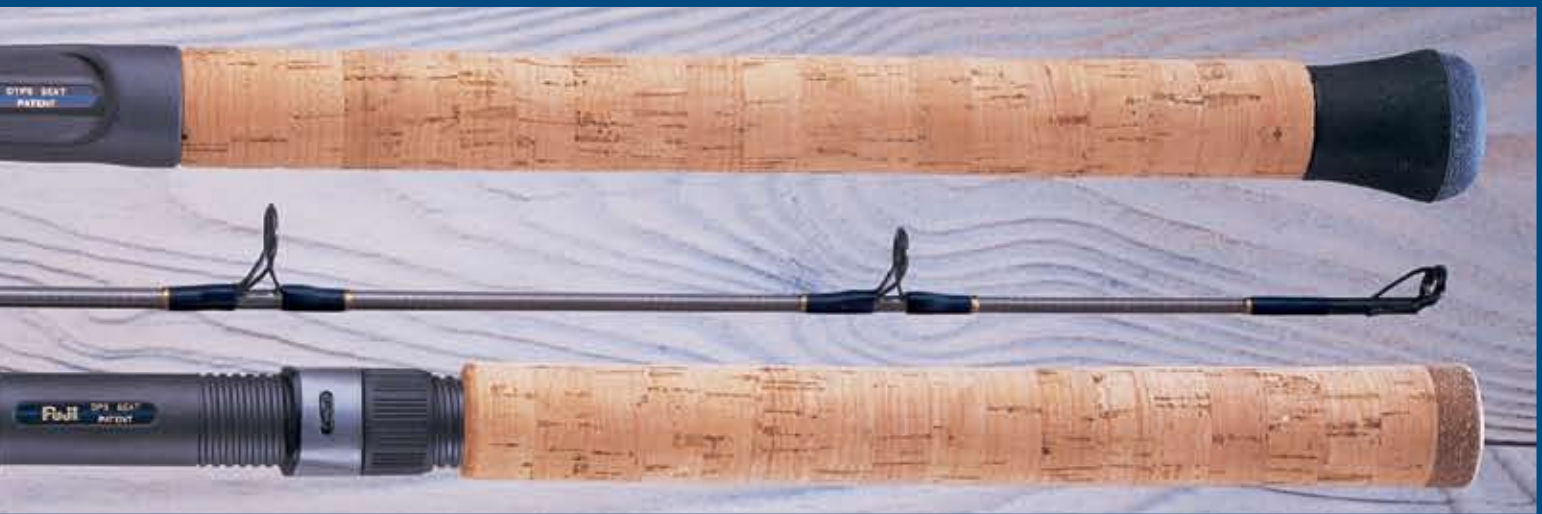

New material now represents yet another dramatic improvement in rod technology - the new Nickelite series, pioneered by Star Rods. Nickel coated carbon fiber on the outer layer is wrapped around a high modulus graphite core. The result is a rod that is more sensitive, stronger and more impact resistant.

Never before did power and precision come in such a beautiful package. Each Nickelite blank has a beautiful silver metallic appearance with accented windings. The rods are fitted with the best components, including Fuji guides and reel seats. Smooth power, crisp sensitivity and un-equalled impact resistance are the benchmarks of Nickelite rods. They have a limited lifetime warranty. Fish without fear.

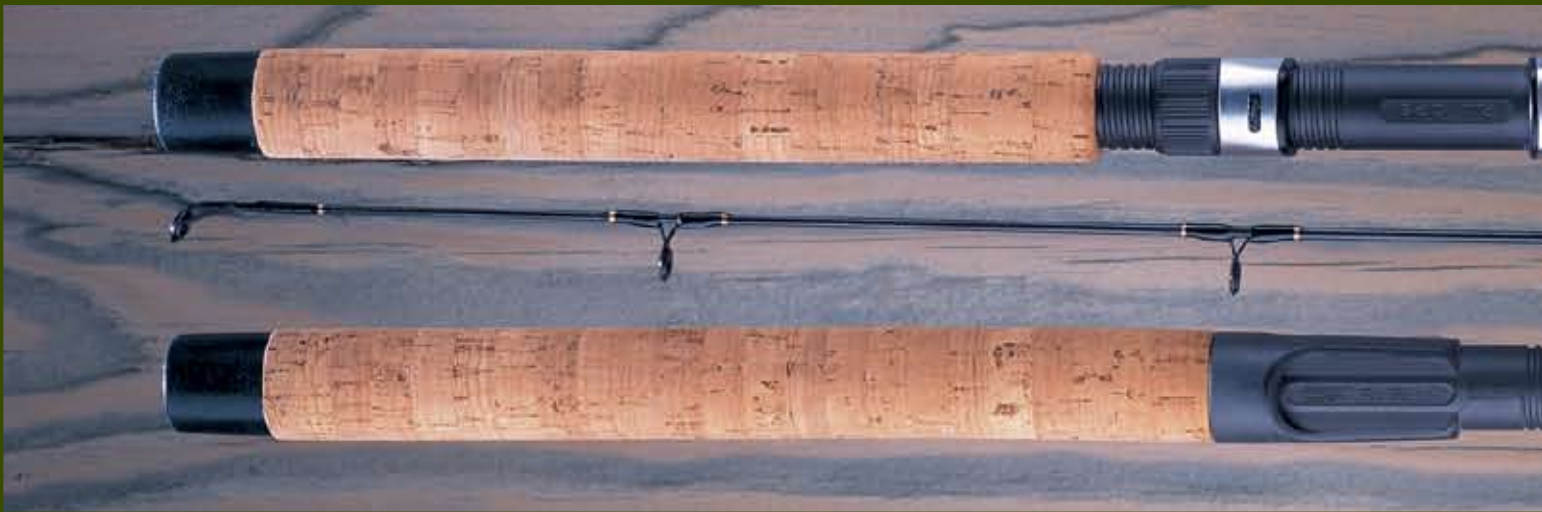

The Nickelite rods are available in actions and weights for everything from freshwater bass to coastal tarpon. Nickelite rods have extremely sensitive tips and hook-setting backbone to spare.

*Nickel coated carbon fiber on the outer layer is wrapped around a high modulus graphite core.*

## Stellar® Lite

High modulus graphite is a term kicked around in rod building, but few know what it means. To a tackle innovator like Star Rods, it's the guts of the powerful, responsive and durable IM-6 graphite Stellar Lite rod series.

Fast, flexible tips with hook-setting strength to spare, Fuji guides and reel seats, plus a limited lifetime warranty are the hallmarks of Stellar Lite rods. Whether you're after smallmouth bass on inland rivers, giant tarpon on the coastal flats or even huge stripers in the surf, there's a Stellar Lite rod for the job.

*There's a Stellar Lite rod built exactly for the type of fishing you do – whether it's offshore, inland, coastal or surf.*

## Stellar® Surf

Stellar Surf rods provide superior rebound strength, hook-setting power, exceptional casting ability and performance. A high modulus graphite blank offers power & responsiveness. The finest parts available include a Fuji reel seat and cork tape grip. Stellar Surf rods are covered by a limited lifetime warranty.

Whether chasing bluefish and stripers or casting lures, there is a Stellar Surf rod for the job. There are 14 models (11 new models ★) and 10 actions to cover all your surf fishing needs.

# Stellar® Lite Jigging

Whether jigging in 400 feet of water for giant grouper with vertical jigs or 10 feet of water with conventional type jigs, these rods will do it all. By using our proven Duratech technology and combining it with thick-walled, thin-diameter blanks we came up with these lightweight, yet extremely powerful, series of rods. While initially designed for deep water vertical jigging, we found them very versatile for any kind of fishing where lightweight and extreme power is desired. They can be used for casting small baits or lures on the lighter models and live bait, kite fishing and even trolling on the heavier models. We see anglers constantly finding different purposes for these rods; of course, deep jigging is what we originally designed them for. The fact that they can be used for other purposes just adds to their value. Add to this 50 years of rod building and designing experience and a limited lifetime warranty. What you get is what you're used to from Star Rods, THE BEST.

# Handcrafted

When you're ready to call "Fish on!", the rod you want in the fighting chair is a Star Handcrafted rod. Each starts with a unique custom blank, many featuring new Duratech technology. Duratech blanks are made by combining multi-directional graphite with a special epoxy. The result is a rod with greatly increased sensitivity, lifting power and toughness. It also increases durability when a rod is jammed or over-bent in any direction. The graphite epoxy ratio is individually selected for each Handcrafted rod to insure the perfect action, weight, strength and maximum durability.

From custom assembly to the diamond wrap accent, Star Rods does it all by hand. Craftsmanship that qualifies Handcrafted rods for a limited lifetime warranty.

Designed for all-around fishing, Handcrafted rods are available for bottom fishing, casting, trolling, spinning, stand-up and drifting tactics. Naturally, they feature top quality Fuji guides and reel seats. Some actions feature the patented Power•Butt®, and virtually all feature Star Rods' exclusive Power•Patch. Trolling and stand-up models feature AFTCO and Stuart components.

*Star Handcrafted rods with new multi-directional Duratech technology are now even more sensitive, powerful and durable.*

# Delux

Saltwater angling is tough on gear. The sea is tough, the salt is tough, the fish are tough. So is the Delux series of Star Rods. Made with premium E-glass, these rods will take the pounding the sport hands out. Each rod has a limited lifetime warranty.

Delux series rods are available for casting, live bait, bottom fishing, jigging, trolling and more. Their shock-absorbing action helps keep the pressure on the fish - not on you.

Some Delux series rods feature Power•Butt®.

*The Delux series is made from premium E-glass and is designed for tough salt water action.*

## WARRANTY

Every Star Delux, Handcrafted, Stellar, Nickelite, and Plasma rod is covered by a limited lifetime warranty against defects in workmanship or materials for the lifetime of the original owner. Should damage occur due to defects in workmanship or materials, Star Rods will, at the company's discretion, either repair or replace the rod at no charge. This warranty does not cover damage resulting from an accident, neglect or normal wear and tear. This warranty is limited to the replacement of the rod only and does not cover consequential or incidental damages. Star Rods shall not be liable for incidental or consequential damages.

© 1998 Star Rods. Star Rods, Plasma, Nickelite, Stellar Lite, Power•Patch and Power•Butt are registered trademarks of Star Rods, Inc. Fuji, AFTCO, Stuart and others are registered trademarks of their respective owners. We reserve the right to change or discontinue any specifications, designs, construction, features or models without notice or obligation. Weights, specifications and measurements are estimates, and can vary because of the variances that occur in hand-crafted manufacturing.
